

Samsung Austin Semiconductor is excited to announce a pilot internship program for high school graduates in the Austin area. This program will give graduates an opportunity to learn the semiconductor industry and gain valuable hands-on experience.

At the end of the 10-week internship, the graduates will have enough knowledge and experience to determine if they are prepared to launch a career with Samsung, as a technician. This includes an opportunity to pursue a 2 year degree at ACC in 4 specific degree fields.

*Come find out how to get
college paid for while
gaining valuable hands-on
experience in a high tech
industry.*
